Good Morning Margaret,

It was detected in the method blank, not in the sample.

Amy,

Thanks for the info. I do have one more question. Was the TIC butlyated

hydroxytoluene (1.2 ug/l) part of the QA/QC results or part of the sample results?

Hi Margaret,

I got your voice mail about the oxygenated hydrocarbon TIC question.

The method blank (MB) TIC has a result of 5 ug/L.

Your sample (Meadows 090330) TIC has a result of 7.1 ug/L.
