Dear Sir:

In regards to the intention of Bristol Resources and of the Dec. 19 and 20th hearing on the Leathers Well, I would like to further my protest. Since writing the letter of July 12, 1994, I have talked to a state geologist from another state. He suggests that the land might not be contaminated from the saline solution, but that the oil production from my land could be pushed to other wells. If you allow this than Bristol Resources should have to make some payment from the production of their wells and all other oil companies in this proximity should have to pay to all of us who are neighboring lands who might be adversely affected..

Since I am an offset owner of minerals and of surface I stll object in that Bristol would be allowing an uncontrolled flow and unmonitored flow into the Morrow formation and would be looking for the advantages to come to their production on other lands.

Sincerely,

Willa Mae Silliman Southard

Denver, Colo. 80203

Dear Sir:

I received a notice from Bristol Resources of their intention of dumping saltwater in Leathers "B" Well #3. They say that this could be 130 barrels per day. I believe that our land would definitely be adversely affected by this disposal. I would ask that you do not allow them to do this. If it is necessary to have a public hearing for this to be stopped, then by all means do so. Please notify us by registered or certified mail with receipt requested in order for us to know about the hearing. A newspaper notice would not be enough for all landowners to be aware of the hearing.

Sincerely,

Willa Mae Silliman Southard
