You were copied and received the S/T guidance document detailing the procedures. You need prior approval to change any plans previously approved.

The APD and sundry need to be filed today – if you drilled off the plug yesterday there must be a directional plan.

There's Form 42 that says you'll be frac'ing this well on Wednesday – please review the recent frac notices to see if there needs to be corrections made.

Diana

Diana,

This is the first notification.

If this notification time period was not punctual enough, I apologize as I may have mis-understood our last phone call concerning ST's months ago, as was under the impression that if ST's were determined and carried out over the weekend, Monday morning notices were suitable.

If protocol is that notices will to be made immediately during any day or hour, Carrizo will sternly follow this procedure for all future ST's. I would just like to request the 24 hour contact.

Hi there - in case you need it - hopefully not. We'll give a verbal if necessary and then we expect the 'paperwork' within 24 hours. My cell is 303-918-6320.

Thanks,
Diana
