hi,

Yes you have verbal permission to proceed. I will add another plug at 3900' to the NOI, either a CIBP with 2 sx or a 100 ft cement plug.

thanks,

Steve

> Hey Steve,
> Just wanted to follow up on my voicemail I left Thursday. While prepping the SLW Ranch 12-7 123-20519 we discovered holes in casing from 1709’-1741’. We would like to expedite this P&A to be able to meet the offset frac deadline and ensure proper isolation. We have submitted a from 42 showing a start date of Wednesday morning and bradenhead pressure as of this morning is 0 PSI, we will continue to monitor prior to P&A and let you know if that changes. We will submit the information attached on a from 6 NOIA but were hoping to receive verbal approval before hand, take a look and let me know if we can

proceed as proposed next week. Thanks and have a great weekend!
