AIR MAIL

CONSERVATION AND UNITIZATION
Rangely Field, Colorado

To Our Rangely Royalty Owners:

This is in further reference to the letter we wrote you on July 16, 1954, in which we presented the West Rangely Weber Unit Plan. The response to that proposal has been extremely gratifying, and we have received a great many "Joinders" from Royalty Owners who believe, as we do, that unit operation is essential. However, there are still some of you who have not executed the "Ratification and Joinder," and it is for that reason that we are again writing to you.

We appreciate the fact that our request to execute six copies of the "Ratification and Joinder," have them notarized and return them to us is a considerable imposition upon your time and causes you some expense. However, we do want to urge you to go along with us in this project. Will you please again examine our letters and the "Unit Agreement" and then let us have the signed papers necessary to indicate your joinder in the Unit.

If any questions have occurred to you or if by any chance the previous correspondence has miscarried, please let us know immediately so that we can remedy the situation.

Yours very truly,

Woollen H. Walshe
General Attorney
Unitization
