Kevin,

Please arrange the braidenhead testing activities on Monday so you do not arrive at the subject wells before 1:00 PM. The reason is to allow time for a consultant from Golder Associates (on behalf of Marathon) to drive up from Denver. That person will collect split samples of any liquids and gasses encountered during the BrHT.

I gave your cell and office phone numbers to Randy March of Golder Associates so he can contact you directly and confirm you won't be arriving before 1:00 PM.

I'll call you on your cell to be certain you have gotten this message.

Chris
