Evergreen Analytical, Inc.

Date: 23-Jun-08

Lab Order: 08-3949

Client Project ID

CASE NARRATIVE

SAMPLE RECEIVING

Sample(s) were hand delivered to the laboratory by the client.

Custody seals were present and intact.

The temperature of the sample(s) upon arrival was 5.7 °C.

Sample(s) were received in good condition, in the proper container, and within holding times.

525.2 sample(s) were preserved properly. VOC sample(s) were marked as preserved on the bottle labels.

VOC sample(s) were received with no headspace present. JD

QUALITY ASSURANCE (QA)

Analyses performed on samples in this work order by EAL meet the requirements of the EAL Quality Assurance Program unless otherwise explained. Analyses of drinking water samples meet the requirements of the EPA Manual for the Certification of Laboratories Analyzing Drinking Water, unless otherwise explained. TP

CLIENT SERVICES

The sample was logged in for the full 524 analysis list per the quotation.

In order to reduce paperwork and minimize mis-interpretation of results, the QA pages normally attached at the end of the report have been retained in the project file. They are available upon request. EKH

GENERAL CHEMISTRY

ANIONS_W: Due to high Chloride levels requiring dilutions to separate the Nitrite peak, the detection limit for Nitrite has been raised for this sample. There are no other anomalies to report. JML/MM

METALS ANALYSIS

200.8_DGH: Sample(s) were preserved by the metals group prior to analysis. There are no other anomalies to report. MB

GAS CHROMATOGRAPHY

Method 504.1: There are no anomalies to report. AE

Method 508: One of the two surrogate recoveries for a batch matrix spike (on another client's sample) is below QC limits. Only one of the surrogates is required to be within QC limits for this method.

Evergreen Analytical, Inc.

Date: 23-Jun-08

Lab Order: 08-3949

Client Project ID

CASE NARRATIVE

There are no other anomalies to report. LC

Method 515.4: There are no anomalies to report. AE

GAS CHROMATOGRAPHY / MASS SPECTROMETRY

Method 524.2: There are no anomalies to report. DC

Method 525.2: One of the three surrogate recoveries is above the QC limits for 08-3949-01C and the batch matrix spike (MS). Atrazine, Bis(2-ethylhexyl)phthalate, and Simazine recoveries are above QC limits on the batch matrix spike (MS). The sample is non-detect and the laboratory control spikes (LCS/LCSD) recoveries are within QC limits, proving the analysis is in control. There are no other anomalies to report. TMB/JM

Method 548.1: There are no anomalies to report. TMB

HIGH PRESSURE LIQUID CHROMATOGRAPHY

Method 531.1: There are no anomalies to report. HJ

Method 547: There are no anomalies to report. HJ

Method 549.2: One of the batch matrix spikes showed a recovery below the QC limit due to a matrix interference. All recoveries for the laboratory control spikes (LCS and LCSD) and the other batch matrix spike are within QC limits, proving the analysis is in control. There are no other anomalies to report. HJ

Qualifiers: See case narrative for a discussion

B - Analyte detected in the Method Blank, value not subtracted from result
E - Extrapolated value. Value exceeds calibration range
H - Prep or Analytical holding time exceeded
S - Spike Recovery outside acceptance limits
X - See case narrative
* - Value exceeded the Maximum Contamination Level (MCL), TCLP limit, or if compound is undetected, LQL exceeds MCL.

Qualifiers: U - Analyte not detected at or above the reporting limit

J - Estimated value below the LQL

Definitions: NA - Not Applicable
LQL - Lower Quantitation Limit
MDL - Method Detection Limit
Surr - Surrogate Standard

Qualifiers: See the case narrative for a discussion

B - Analyte detected in the Method Blank, value not subtracted from result

E - Extrapolated value. Value exceeds calibration range

H - Prep or Analytical holding time exceeded

S - Spike Recovery outside acceptance limits

X - See case narrative

* - Value exceeded the Maximum Contamination Level (MCL), TCLP limit, or if compound is undetected, LQL exceeds MCL.

Qualifiers: U - Analyte not detected at or above the reporting limit

J - Estimated value below the LQL

Definitions: NA - Not Applicable

LQL - Lower Quantitation Limit

MDL - Method Detection Limit

Surr - Surrogate Standard

Lab Work Order: 08-3949
Client Project ID:

Dear Adell Heneghan:

Enclosed are the analytical results for the samples shown in the Laboratory Work Order Summary. The invoice is included with this report or has been mailed to another party as indicated on the chain of custody.

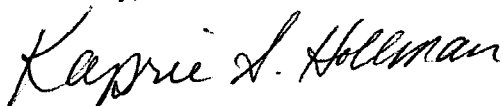

The enclosed data for testing performed at Evergreen Analytical Laboratory (EAL) have been reviewed for quality assurance. A case narrative is included to describe any anomalies associated with the samples or data.

EAL will dispose of all samples one month from the date of this letter. If you want samples returned, please advise us by mail or fax as soon as possible.

A copy of this project report and supporting data will be retained for a period of five years unless we are otherwise advised by you. A document retrieval charge will apply.

Thank you for using the services of Evergreen Analytical. If you have any questions concerning the analytical data, please contact me. Please direct other questions to Client Services.

Sincerely,

Carl Smits / Kaprie Hollman
Quality Assurance
