Subject: 17L pad

This is to confirm your e-mail of 9/10/2009, everything should read 16 wells, this is an email to explain that we always put a few extra slots on these pads in case of emergency, (skid a well, etc.) these slots will never be used unless approved by the state (COGCC) and just gives everyone a little room to work. ~~I checked through my e-mail and last I heard from Steve was on the 20 pad. I will send him an e-mail and ask if there is anything I can do. By the way, we have another couple of pads coming your way. Would you rather I file it paper or would you like it by e-file? Either will do for me. thanks~~
