Subject refile APDs - pad built verification - Parachute Ranch Federal NESE 35 7S 96W

Linda

You submitted refiles for 11 permits on the Parachute Ranch Federal NESE 35 7S 96W pad.

The comments for 6 of them state "The conductor has been set for this well", which I have interpreted to mean that the pad has been built.

However – the other 5 permits do not have that statement in the comments.

The requirements established by the commission for refilling without a Form 2A are:

1. The pad has been built
2. The pits have been constructed

Please send me an email that states that BOTH these requirements are met for this pad.

The permits cannot be approved without this statement from you.
