Hmmm, I thought I caught that.

Proposed drilling date is July 1, 2010 with an estimated duration of 15 days. The estimated date for initiation of interim reclamation should be August 1, 2010.

I found one more error when I tried to save Form 2As. The date planned for construction was 8/1/09 and the estimated date for interim reclamation was 9/1/2009. Both these dates have passed. I need these dates to be sometime in the future. Could you provide new dates? Thanks, Mary
