**Re: NVega Pad 5D
Form 2A, Oil and Gas Location Assessment, Corrected Deficiencies**

Dear Bill,

Attached are the revised documents needed to support the Form 2A for NVega Pad 5D. The attachments include:

- Hydrology Map
- Reference Area Map
- Reference Area Pictures
- Multi-well Plan

In addition, please correct Section 5, Facilities, of the Form 2A currently on file to read as follows:

- Wells change from: 18 to: 31
- Separators change from: 18 to: 31

Please don't hesitate to contact me if your review identifies any additional deficiencies in the submitted documents.

Sincerely,

Michael Stanley
