SOURCE: X

SOURCE TYPE: OIL WELL/WELL SITE

CAUSE: FAILURE EQUIPMENT

CAUSE INFORMATION: Thought to be due to a break in a plastic water pipe on a well pad. Unknown amount of produced water ran about 300 ft off the well pad into an unnamed tributary of Wet Canyon Creek, and then into a landowner-built pond in the drainage. The produced water mixed with the pond water, which was melted snow. They are checking records to determine the amount of produced water released.
