Hi Dave,

Noble agrees to the two COA's for this well.

Thanks,

Subject Noble Energy, Millage C 12-29D, NENW Sec 12 T4N R64W, Weld County, Form 2A #400012221 Review

Kate,

I have been reviewing the Millage C 12-29D Form 2A (#400012221). COGCC requests the following clarifications regarding the data Noble has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

1. **Water Resources (Section 14):** Based on depth to groundwater of 24 feet bgs, as well as the highly permeable nature of the near surface unconsolidated materials in this area, COGCC guidelines require designating all locations with shallow groundwater (i.e., less than 20 feet) a **sensitive area**. Although the depth to groundwater cannot be confirmed to be less than 20 feet bgs at this location, the following conditions of approval (COAs) will apply:

COA 2 - Location may be in a sensitive area due to shallow groundwater; therefore if drilling pits intercept groundwater the pit must be lined or a closed loop system must be used.

COA 5 - Operator must implement best management practices to contain any unintentional release of fluids.

COGCC requires your written acknowledgement of these COAs prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
