Subject: Kerr-McGee State 2-16, NENW Sec 16 T1N R68W, Weld County, Form 2A #400006977 Review

Cheryl,

I have been reviewing the State 2-16 **Form 2A** (#400006977). COGCC requests the following clarifications regarding the data Kerr-McGee has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

Water Resources (Section 14): Form 2A indicates the distance to the nearest surface water is 390 feet and based on the 2005 aerial photograph, it appears to be an active ditch. COGCC guidelines require designating all locations within 500 feet of surface water a **sensitive area**. If you concur with this assessment, the following conditions of approval (COAs) will apply:

COA 4 - Location is in a sensitive area because of close proximity (less than 500 feet) to a flowing surface water stream/ditch; therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations.

COA 5 - Operator must implement best management practices to contain any unintentional release of fluids.

COGCC would appreciate your written concurrence with attaching these COAs to the Form 2A permit prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
