Hi Dave,

I apologize for this being such a mess. Since this Form 2A was submitted, I have sat down with Jane Stanczyk and gotten a better understanding of what you all are looking for. Unfortunately, some of the first ones I had filed will probably be bad. I have answered your questions in red below. Please let me know if they are still not adequate.

Thank you for your patience.

*DeAnne*

**Subject:** EnCana Oil & Gas (USA), Federal 25-1 (PH25), SENE Sec 25 T7S R96W, Garfield County, Form 2A (#400016440) Review

DeAnne,

I have been reviewing the Federal 25-1 (PH25) (#400016440) **Form 2A**. COGCC requests the following clarifications regarding the data Encana Oil & Gas has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

1. **Cultural (Section 9):** Form 2A indicates that the distance to the nearest building is 5280 feet, public road is 5280 feet, above ground utility is 1330 feet, and railroad is 2 miles. However, Sheet 1i Of 10, Addendum to Legal Plats for PH-25 Well Pad, indicates that the distance to the nearest building is 0.9 miles (4752 feet), to the nearest public road is 1 mile (5280 feet) feet; COGCC's review indicates 4759 feet, to the nearest above ground utility is 0.35 miles (1848 feet), and to the nearest railroad is 2 miles (10560 feet); COGCC's review indicates 8765 feet. Can you please confirm which distances are correct. I can make the changes if you send me an email with this request.

Dist. to Bldg = .9 miles  
Dist. to Road = 1 mile  
Dist. to Utility = .35 miles  
Dist. to RR = +/- 2 miles

1. **Water Resources (Section 14):** Form 2A indicates the depth to groundwater to be 0 feet bgs for a well located 2321 feet away from the proposed pad. COGCC's review did not find any wells within this

distance; however, there is a water well located approximately 4062 feet to the north (Permit No. 33388-Speakman, other/monitoring well) with a total depth of 120 feet bgs and a depth to groundwater of 80 feet bgs. I can make the change if you send me an email with this request. In addition, the hydrology map submitted with this Form 2A is for the EnCana Warren 15-9 (PI15) Pad (2A#400008608). Please submit a hydrology map for this well pad.

Depth to ground water = 80' below ground surface  
Correct Hydrology map is attached

2. **Rule 303.d.(3).F.ii.aa and bb:** Since the current and future land uses are non crop land (rangeland), a reference area needs to be indicated either on a topographic map (the attached reference area map appears to show the reference area but not the well pad) or in the comments section if the reference area is adjacent to the proposed pad. In addition, four (each of the cardinal directions) color photographs taken during the growing season of the reference area are required within 12 months of the Form 2A permit application date (12/18/2009) unless the reference area is adjacent to the proposed pad and vegetation can be seen on the location pictures. . If you can confirm that the reference area is adjacent to the pad and in what direction, I can make the change if you send an email with this request.

The Reference Area will be next to the pad, directly to the North  
Photos taken from the edge of the pad during growing season have been requested from the field.

These issues associated with the Form 2A need to be resolved prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
