RE: Williams KP 24-16 Form 2A BMP List

Dear Mr. Kubeczko,

On behalf of Williams, I would like to add the following BMPs to the list of site specific BMPs proposed for the KP 24-16 Form 2A:

- 1) Williams will use certified, weed free grass hay, straw, hay or other mulch material used for the reseeded and reclamation of disturbed areas.
- 2) Water produced from the wells on this pad will be collected via buried pipeline into Williams KP water management system. This will eliminate water hauling truck visits for the life of the wells on this pad.

These BMPs were developed in consultation with Michael Warren at CDOW.

Please contact me at the telephone number or e-mail address below if anything further is needed.

Thank you,

A handwritten signature in black ink, appearing to read "Kent Rider", with a stylized flourish at the end.
