The Office of Legacy Management (LM) is reviewing aforementioned applications and the location map provided by COGCC for the following wells and their respective locations:

APDs IN PROCESSING			BOTTOM HOLE LOCATION		
OPERATOR	WELL NAME	WELL #	LOCATION	N LATITUDE	W LONGITUDE
LARAMIE SAVAGE	18-01B	SWNW 17 7S 94W	39.443681	107.921828	
LARAMIE SAVAGE	18-07B	SWNW 17 7S 94W	39.44087	107.926489	
LARAMIE SAVAGE	18-08C	SWNW 17 7S 94W	39.440133	107.921838	

At this time, DOE does not request any additional information but would encourage COGCC to place general language in the permit such that the company would accommodate DOE sampling requests in the future. DOE agrees with the COGCC assessment that the pad is located approximately 2.95 miles from the Rulison site located at SWNW Section 117 7S 95W, and the bottom-hole-locations range approximately from 2.75 to 2.98 miles from Project Rulison. Accordingly, DOE agrees with COGCC that all wells fall under the Tier 2 sampling and monitoring of the COGCC Rulison Sample and Analysis Plan and one well is located in Sector 1 and two wells are in Sector 2 of the Rulison SAP. DOE will continue to review the proposed locations and subsurface orientations of the propose drilling for documentation when sampling occurs. Thank you for the opportunity to comment on these permit applications. Please e-mail or call at 240-252-8506 if you require further information.
