Dee,

I have been reviewing the JC Donnell 20 (#2094240) **Form 2A**. COGCC requests the following clarifications regarding the data Wexpro has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment.

1. **Construction (Section 6):** Form 2A does not indicate if H<sub>2</sub>S is anticipated. I assume that it is not. I can make the indication (No) on the Form 2A if you send an email with this request. **The form has no place to indicate that H2S is not anticipated, therefore, I if the yes box is not check then H2S not anticipated.**
2. **Water Resources (Section 14):** Form 2A indicates the depth to groundwater to be 812 feet bgs for a well located 7060 feet from the proposed well pad. COGCC's review indicates there is a water well (Permit No. 4438-R-Mountain Fuel Supply Company, domestic well) to the northeast, with a total depth of 812 feet bgs, a depth to groundwater of 759 feet bgs (based on well log), and a pumping rate of 27 gpm. I believe this is the well you located. The number that comes up on our GIS map is 812 feet (this number often pertains to the total depth of the well, not the depth to groundwater). I can make the change if you send me an email with this request. **Please make the necessary changes to reflect the correct information. If you could send me a list of all of the water wells in the Powder Wash area with the legal description and depth to ground water it would help for future permits.**

These issues need to be addressed prior to COGCC passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
