COGCC Approved: _____ Director of COGCC Date: 2/10/2010

Location is in a sensitive area because of proximity to a domestic water well and potential for adverse impact to groundwater; therefore, either a lined drilling pit or closed loop system is required.

Location is in a sensitive area because of close proximity to surface water, therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations.

Operator must implement best management practices to contain any unintentional release of fluids.
