Re: **Rule 318A.a, 318A.c., and 318A.e. Waiver**
Petroleum Development Corporation
Cockroft 19V - NENE Sec 19, T 5N, R 63W-Vertical Location
Weld County, Colorado

Dear Director:

COGCC Rule 318A.a. specifies five “drilling windows” per quarter section of land in the Greater Wattenberg Area (GWA) – 400’x400’ boxes in the center of each quarter/quarter section, and an 800’x800’ box in the center of the quarter section.

COGCC Rule 318A.c. specifies that new GWA surface locations must be “twinned”, i.e. located less than 50 (fifty) feet from an existing surface well location, unless the surface owner provides a consent to the exception.

COGCC Rule 318A.e. establishes additional infill and boundary bottom-hole locations for Codell, Niobrara, and J-Sand formations, which shall be reached by utilizing directional drilling techniques from the GWA windows.

The Cockroft 19V surface location is located outside of the drilling window and is not located within 50 feet of an existing well. The surface owner has agreed to the location, as the location fits with their planned use of the property. Please find the waiver attached.

Therefore, Petroleum Development Corporation respectfully requests a waiver for the surface location of the Cockroft 19V, in the above-captioned location, regarding the rules captioned above.

If you have any questions, please contact Sarah Garrett at 303-860-5800.

Thank you,

Sarah M. Garrett
