Subject: RE: Peppler 3-36, COGCC Remediation Project #1752, SWNW S 36-T5N-R66W, revised monitoring schedule

Steve,

COGCC agrees to the revised monitoring program referenced below for the Peppler 3-36. I will scan a copy of this email into the project file to document COGCC approval.

Thank you,

John Axelson, P.G.

Subject: Peppler 3-36, COGCC Remediation Project #1752, SWNW S 36-T5N-R66W, revised monitoring schedule

John:

As discussed this morning, this email correspondence is being sent to identify the current monitoring schedule for the above referenced site.

In a report dated 8/6/09, LTE requested a reduction of the monitoring program. On October 6, 2009, I spoke with Mr. Bob Chesson about a reduction in the monitoring program for this site. Bob agreed to limit the monitoring schedule to:

P-WS-01, P-WS-02, P-WS-04, MW19, MW20, MW26, MW12, and MW32 for BTEX by EPA Method 8260 (3 surface water samples, 5 gw. Samples)

However, on January 9, 2010, my client, Mr. Paul Schneider of Anadarko received a correspondence requesting the former monitoring schedule: MW12, MW19, MW2, MW 21, MW23, MW24. MW26. MW28, MW32, and all four water samples PWS01-PWS04 (9 gw/4 surface) - This schedule is the schedule that Mr. Randall Ferguson agreed to in June 2007.

I believe that an error was made in listing the schedule.

Per our discussion, LTE will continue with the newer program accepted by Mr. Chesson last October. Please review this correspondence, and if you have any further requested changes to the monitoring program, please respond to this email or feel free to call me at 303-962-5506.

Have a great day - Steve
