Dave,

- 1) That is the well I was referencing
- 2) I've attached some supplemental drawings that further show improvements around the pad.
- 3) I've attached the photos again with the date on it.

Let me know if you need anything else.

Thanks,
Jessica

Jessica,

I have been reviewing the Jacques Ute 34-14 **Form 2A** (#400004846). COGCC requests the following clarifications regarding the data Black Hills has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

1. **Water Resources (Section 14):** Form 2A indicates the depth to groundwater to be 250 feet bgs for a well located 7128 feet from the well pad. COGCC's review did find one water well (Permit No. 143747-Jaques, domestic well) located approximately 1.08 miles (5702 feet) to the north; with a total depth of 250 feet bgs, a

depth to groundwater of 192 feet bgs, and a pumping rate of 0.1 gpm. I believe this is the well you located. I can make the change if you send an email with this request.

2. **Rule 303.d.(3).C.:** The Location Drawing and the Proposed Pipeline Drawing for Jacques Ute 34-14 do not show the 400-foot radius from the edge of disturbance showing all visible improvements. One or both of these drawings should show this line and any improvements.
3. **Rule 303.d.(3).A.:** The Location Pictures do not have the date taken on them. Can you please resubmit them with this information.

COGCC would appreciate your review of these issues. They need to be addressed prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 625-2497 x5 (office) or (970) 309-2514 (cell), or email. Thanks.

Dave
