RE: Exception Location Waiver  
NE/4 Section 32 T6N 66W  
Well Names: AG 32-31D, 459' FNL and 759' FEL  
AG 33-11 D, 444' FNL and 747' FEL

Dear Aggregate Industries,

The proposed surface locations for the wells captioned above lie just slightly outside of the designated drilling windows for the Greater Wattenberg Area (GWA).

It has been requested by you during consultation that these wells be drilled from the above designated locations as to not interfere with your future land developments.

Nevertheless, the Colorado Oil and Gas Commission require that a consent waiver be signed by the surface owner when the surface holes lie outside of the designated drilling window for the GWA.

I respectfully request your signed consent to the exception locations per the requirements of the COGCC.
