15. Comments:

This location assessment is for the construction of the PA 22-21 well pad. There will be 15 new wells drilled when complete. Surface and minerals are owned by the Federal Government. The location reference point for this pad is the PA 311-21 well from which all measurements were taken. Since this well pad is within a sensitive area, Williams will employ the following BMP's to support protection of surface and ground water: 1) Williams will ensure 110% secondary containment for any volume of fluids contained at well site during drilling and completion operations. 2) Williams will implement best management practices to contain any unintentional release of fluids. 3) A closed loop system will be used. Reference Photos will be provided at a later date after snow melt.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
