RE: Swanson I-14
Form 27, Lab Data & Closure Request Cover Letter
API 05-013-06190
Sec.14, T2N R69W
Boulder County, Colorado

Dear Mr. Chesson:

On March 24, 2010, a suspected release of approximately 24 barrels of produced water occurred at the abovementioned location. Soil samples at the site indicated no impact to soils around production tank. The production tank was filled with clean water and tested for integrity. No leaks were detected. Loss of tank volume has been attributed to a melting ice shelf in the production tank that was unrecognized by the pumper.

The attached documentation includes a completed Form 27, laboratory analytical results from confirmation soil samples, and a site diagram showing sample location and results. Based on the attached laboratory analytical results, NEI is requesting that the COGCC consider this location closed, requiring no further action.

Please contact the NEI environmental department at (970) 785-5025 if you have any questions or require additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mikel Cox'.
