Bryson  
Bruce,

This confirms my verbal approval of the change, as discussed during our telephone call yesterday. Please proceed.

Thanks,

**Subject:** 697-12A-18 Plug and Abandonment Procedure

Dave,

Attached is a revised procedure to permanently abandon the 697-12A-18 well. As discussed over the phone the revision made to the procedure is to perforate the 4-1/2" casing at a depth of 55', and circulate cement before cutting the casing stings 4' below the surface. The previous procedure had us cutting the casing, and then one inching cement into the 4-1/2" production casing, and the 4-1/2" x 9-5/8" annulus from 55' to surface. Please let me know if you have any questions or concerns.

Thank you,

**Bryson Goeres**
