32. BOP Equipment Type: ☐ Annular Preventer ☒ Double Ram ☐ Rotating Head ☐ None

33. Comments Production/1st String Casing top of cement will be greater than 500 feet above top of gas. This pad straddles the NENW and NWNE of Section 15. I certify that all conditions in the original permit are the same except property line distance has been corrected and other typographical errors and our casing program has been updated. A new plat has been attached because although SHL lat/longs have not changed, there was an error concerning footages on the original plat. Also the most recent directional plan is attached because although BHL has not changed from last permit, the TD is incorrect on permit. There have been no other changes to land use, well construction or lease. This well is being re-filed under the old rules and does not require a Form 2A because this pad is built, there will be no expansion of the pad or additional surface disturbance, and this location is not in a RSO area. Also, please note this well is an exception location to Rule 603a(2) however we were granted a variance for this pad prior to construction by providing your office with signed property line waivers from both affected surface owners when permits were originally filed for this pad location so we have not attached new waivers but we have attached the original waivers for your reference. This Refile Form 2 does not require a Form 2A because the pad has been constructed, a closed loop system is being used so no pits need to be constructed, the refiled well will not require any expansion or additional surface disturbance of the pad, the location is not in a wildlife restricted surface occupancy area (RSO); consultation with CDOW is not required, and the location does not require a variance from any of the rules listed in Rule 306.d.(1).(A).(ii).; consultation with CDPHE is not required. Please let me know if you need anything else. Thanks!
