### 15. Comments:

#1 Consultation: Since this location is in a "Sensitive Wildlife Habitat Area" Antero contacted CDOW prior to submittal of this APD and discussed best management practices (see attached Proposed BMP List which addresses wildlife issues).

#4- The proposed Fenno Ranch A1 well location was used as the reference point for well distance measurements.

#6: The disturbed area acre amounts include the access road.

#14-Water Resources: The distance to nearest surface water provided is to an intermittent stream as shown on Hydrology Map.

The depth to ground water was determined by using static water level data of 2nd nearest active water well (Permit# 22618-MH/Receipt# 0022618). Distance given was to actual nearest active water well, however there was no static water level data available for that well.

Our reference are is undisturbed ground immediately adjacent and to the South of the proposed well pad, as shown in the "looking South" location photo.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
