### 15. Comments:

Water well permit #201205 was used to determine depth to ground water. Conductor casing will not be used. The Spaur 10GD, 10HD and 23-10D wells will be drilled from the same pad and are new locations. The Spaur 10-1 well is also located at the site and is an existing well. The wells will be tied into an existing tank battery facility located approximately 412' to the west. A 2A for the tank battery facility will not be filed since the additions will not expand beyond the originally disturbed area.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
