### 15. Comments:

WATER PERMIT #41772-MH; There are irrigation ditches 194 feet and 253 feet from site. Based on site specific conditions evaluated within the context of topography, geography, nature of operations and proximity to surface water, APC will implement BMPs in accordance with good engineering practices to mitigate the potential for impacts to surface water from an unintentional discharge of fluid. Kerr McGee Oil & Gas LP requests approval of Rule 318Aa exception location: Wellhead is to be located outside of a GWA drilling window. Surface Owner consent is given by article 3.d of the attached Surface Use Agreement.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
