Denver, Colorado 80203

Re: COGCC Facility/Location 413288 (a/k/a Collection Station No. 47) – Fourth and Final Quarterly Rule 805.b(2)B Progress Report

Dear Mr. Neslin:

As required by the variance granted by the Colorado Oil and Gas Conservation Commission (“COGCC”) on September 29, 2009, to allow time to reduce the above facility's potential to emit VOCs above five tons per year in compliance with Rule 805.b(2)B, Chevron U.S.A. Inc. (“Chevron”) reports that it has installed the vapor recovery unit (“VRU”). The VRU is fully operational as of August 2010.

Chevron has fulfilled the requirements of COGCC’s September 29, 2009 Rule 502.b. Variance to Rule 805.b(2)B for this location. Thank you for the opportunity to address this issue. If COGCC requires further information, please let me know.

Sincerely,

A handwritten signature in blue ink that reads "Stacey Saunders".

Stacey Saunders
