Venessa,

I have been reviewing the Kimball Creek 23-4C-995 Form 2A (#400091561). COGCC requests acknowledgement of the conditions of approval (COAs) presented below prior to passing the Oil and Gas Location Assessment (OGLA) review.

1. Water Resources (Section 14): Form 2A indicates the distance to the nearest surface water is 467 feet. COGCC guidelines require designating all locations within close proximity to surface water a sensitive area. The following conditions of approval (COAs) will apply:

COA 4 - Location is in a sensitive area because of proximity to surface water; therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations; including, but not limited to, construction of a berm or diversion dike, diversion/collection trenches within and/or outside of berms/dikes, site grading, or other comparable measures sufficiently protective of nearby surface water.

COA 5 - Operator must implement best management practices to contain any unintentional release of fluids.

COGCC would appreciate your concurrence with attaching these COAs (item 1) to the Form 2A permit prior to passing the OGLA review. If you have any questions, please do not hesitate to call me at (970) 309-2514 (cell), or email. Thanks.

Dave
