5. DESCRIBE PROPOSED OR COMPLETED OPERATIONS

The original permitted top of cement for the 697-09-54A well was at 5290'.

The CBL indicates a top of cement at 7620'. The top perf is at 7830', which is 210' below the top of cement.

The Bradenhead reading for this well on 8/11/2010 was 0 psi.

Oxy requests that the top of cement be revised to 7620' because we believe there is adequate coverage between the top of cement and the top perf.
