Subject: FW: Williams Production RMT, Wheeler Gulch Tank Pad, SESW Sec 27 T6S R96W, Garfield County, Form 2A (#400080955)

Greg,

I have been reviewing the Wheeler Gulch Tank Pad **Form 2A** (#400080955). COGCC will attach the following conditions of approval (COAs) based on the data Williams has submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA) review.

1. **General:** The following conditions of approval (COAs) will also apply:
 - COA 11** - Secondary containment berms/steel rings must be lined.
 - COA 23** - Operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during operations; including, but not limited to, construction of a berm or diversion dike, diversion/collection trenches within and/or outside of berms/dikes, site grading, or other comparable measures sufficiently protective of nearby surface water. If fluids are conveyed via pipeline, operator must implement best management practices to contain any unintentional release of fluids.
 - COA 46** - The location is in an area of high run off/run-on potential; therefore the pad shall be constructed to prevent any stormwater run-on and/or stormwater runoff.

Based on the information provided in the Form 2A by Williams, COGCC will attach these COAs to the Form 2A permit, Williams does not need to respond, unless Williams has questions or concerns with details in this email. If you have any questions regarding this email, please do not hesitate to call me at (970) 309-2514 (cell), or email. Otherwise I will assume that these changes, requests, and COAs are acceptable to Williams. Thanks.

Dave
