Subject: RE: Ft St Vrain

Hi Nancy,

For the 4X well, we have been managing all of these incidents under remediation number 723. If possible, could remediation number 4315 be closed and linked to remediation number 723? Also, you are correct that Document 2606722 is for the 13X well and should be moved to Remediation number 3685.

Let me know if you have any questions.

Thanks,  
Mike

Subject: Ft St Vrain

Mike,

I'm looking at the information you sent, and I think I have figured out the Ft. St. Vrain projects.

At the #4 well (API 123-10163), there have been a total of 3 incidents reported. Two of these are combined under one Remediation #, and the third has a separate Remediation #. Remediation is on-going on both of the Remediation projects.

Incident #	Form 27 #	Remediation #
851975	1104811	723
1175416	1104811	723
1982383	1984173	4315

At the #13X tank battery (API #123-10456), there is one incident with one Remediation # that is on-going.  
1396463 1396784 3865

It appears that I can close the open Form 19 #1982383 with reference to the on-going Remediation #4315 (which is where my original query started).

Also, Document #2606755, filed under Remediation #4315, relates to the injection that happened at 13X and should be moved to Remediation #3865.

Please let me know if this is correct, if you need more information, or if there is something I missed.

Thanks for your help.

Nancy,

I tried to send the email below with the missing forms/reports attached; however, the email was rejected by your server due to the file size. I mailed a data disc with the files today. Please call if you have any questions.

Thanks,

Mike Dinkel

Subject: Spill report follow up questions

Nancy,

I've attached the spreadsheet with responses to your questions. Also, I have attached the various forms/reports that are missing from the COGCC database. My only question is on row three of the spreadsheet. The well is listed as the Ft. St. Vrain. Is this the Ft. St. Vrain 4? Based upon the incident date it would be; however, it lists injection approval under most recent correspondence. We have not asked for injection approval at this site. I think the injection approval may need to be moved to the Ft. St. Vrain 13X. If you have any other questions, please let me know.

Thanks,

Mike Dinkel
