---

Todd,

Based on the information submitted, COGCC requires no further action at this time in regard to the pit closure at the subject location. The Remediation Workplan (Project #5356) has been changed to closed status in the Colorado Oil & Gas Information System. Please retain a copy of this email as verification of COGCC concurrence with the closure request.

Please note that Pit Permits #118453 (DOC) and #112043 (Walsh) were associated with this API number, and have been closed in the COGIS system also.

Please give me a call if you need any additional information.  
Thanks,

Nancy Prince
