### 15. Comments:

Flare stack will be removed after a gas line is installed. One of the 2 heater treaters will be removed when production volumes fall below the capacity of a single heater treater. Depth to groundwater was determined from Water Well Permit #8242, which is also the closest water well. This well is located to the north of the location in Section 6, T8N-R61W. The closed loop system utilized to drill the referenced well is a semi-closed loop system. Drilling mud and cuttings will be remediated prior to burial onsite.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
