## History:

03/23/09: 171 psi, blows down to a 5 psi vapor in 40 minutes, blows dead in about 12 hrs. No fluid.

We want to hook this venting bradenhead up to a separator to use as supply gas, starting April 1st.

01/26/10: completed 180 venting period. 7 day buildup was 90 psi. Removing from vent list.

9-15-10: Encana requests approval to open and vent the bradenhead on this well indefinitely. A 7-day pressure build-up will be obtained and, if that pressure builds to 150 psi or greater during that time, it will be reported on a Form 17. All 7-day build-up pressure data will be reported in our annual report no later than November 1st.
