Rick,

Please find the attached photos for number 1 shown below. Also I approve you changing the sensitive area determination from no to yes. Thanks for your help.

Subject: JULIE CAMBELL 1 - Form 2A (Doc 163328) for SingleTree Resources

Tony,

The COGCC is reviewing the Form 2A oil and gas location assessment for the JULIE CAMBELL 1 well and pit location in the SESE Sec8 T11N R54W, Logan County, and requests the following additional information to complete the Form 2A:

- 1) Location Pictures:** A west facing and northwest facing Location Pictures were attached to the Form 2A. Please submit east facing, north facing and south facing Location Pictures to complete the Form 2A.
- 2) Water Resources:** Please approve me changing the Rule 901.e. Sensitive Area Determination from No to Yes. This determination is typically made at the request of the Director and requires extensive site-specific data be supplied. Note that the Sensitive Area Decision Tree is no longer a part of the Rules.
- 3) Reference Area:** For non-crop land locations, a reference area used for a reclamation basis must be designated. This requires the submission of a reference area photographs and a reference area map. The reference area photographs must include four (4) color photographs of the reference area, taken during the growing season of vegetation and facing each cardinal direction. The reference area map must be a topographic map showing the location of the well site, and the location of the reference area. Since it is winter, this information may be submitted at any time up to twelve (12) months after the Form 2A.

Please contact me if you have any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
