Subject: SPEAKER 27-34-8-61 - COGCC review Form 2A (Doc 400138673)

Hi Venessa,

The COGCC is reviewing the Form 2A oil and gas location assessment for the SPEAKER 27-34-8-61 well location in the SWSE Sec27 T8N R61W, Weld County, and requests Carrizo's approval of the following changes to the Form 2A:

- 1) **NRCS Map Units:** There was no NRCS Map Unit Description attached. Please submit me the NRCS Map Unit for the Olney fine Sandy Loam and I will attach it to the form 2A.
- 2) **Water Resources:** The location is in the Upper Crow Creek Designated Basin and therefore a sensitive area. Please approve me changing the Sensitive Area Designation from No to Yes.
- 3) **Conditions of Approval:** The following conditions of approval will apply to the freshwater reserve pond at the location:
 - COA 1:** The fresh water storage pit shall include signage that: identifies the pit use as a freshwater-only pit, prohibits placing E&P Waste in the pit, and lists each well that the pit will serve.
 - COA 2:** Operator is prohibited from allowing any fluids to flow back to the fresh water Frac Pit.
 - COA 3:** The freshwater storage pit shall be constructed and maintained to prevent terrestrial wildlife or livestock entrapment.
 - COA 4:** Notify COGCC OGLA Specialist Rick Allison at rick.allison@state.co.us 48 hours prior to construction of the frac reserve pit.

Please contact me if you have any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
