### 15. Comments:

Flare stack will be removed after a gas line is installed. One of the two heater treaters will be removed when production volumes fall below the capacity of a single heater treater. Depth to ground water determined from Water Well Permit #214376, which is the closest water well. This water well lies to the northwest of the location in Section 14 T6N R62W. The closed loop system utilized to drill the referenced well is a semi closed loop system. Drilling mud and cuttings will be remediated prior to burial onsite.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
