## TECHNICAL INFORMATION PAGE

FOR OGCC USE ONLY

1. OGCC Operator Number: 66571 API Number: 05-045-10687-00
2. Name of Operator: OXY USA WTP LP OGCC Facility ID #
3. Well/Facility Name: Pond #1 Well/Facility Number: 291974
4. Location (QtrQtr, Sec, Twp, Rng, Meridian): SWSE Section 15, T6S, R97W, 6th PM

This form is to be completed whenever a Sundry Notice is submitted requiring detailed report of work to be performed or completed. This form shall be transmitted within 30 days of work completed as a "subsequent" report and must accompany Form 4, page 1.

5.

**DESCRIBE PROPOSED OR COMPLETED OPERATIONS**

OXY USA WTP LP (OXY) would like to make changes to the Form 27 remediation / investigation plan which was submitted to the COGCC on October 16, 2009 for site investigation work being conducted in conjunction with the OXY 15-54 well pad. Attached is a copy of the fluorimetry update and modified plan to add an additional 160 bbls of fresh water to each trench and continue to monitor the wells and springs for presence of the dye for at least 30 days from the time the water is added.

In addition to the modification for the addition of the water OXY would like to request from COGCC that we be allowed to leave both the Pond #1 and reserve pit trenches open over the winter. We have taken measures to assure that both trenches are secure from impacts to wildlife and personnel from a safety standpoint. This will allow us to compile and analyze the sample results which have been generated as a result of this investigation and have the ability to re-evaluate if necessary these trenches next spring. If all is found to be in order measures will be taken as early as is practicable next spring to close and backfill each trench.

Attachments: Walsh Fluorimeter update dated December 1, 2009
