Rick, Can you make the following change and notation to the Allenby 1-8H form 2A?

Sensitive Area Designation answer should be changed from no to yes.

Please note that a berm will be built on the southwest corner of the location to prevent storm water runoff from the pad. Erosion matters will also be addressed.

Thank you.

Hi Pam

I received a response regarding items 1, 2, and 5 below. However, I have no response regarding items 3 and 4. Can you provide me an answer?

Thank you,
Rick

Subject: ALLENBY 1-8H - COGCC Form 2A (Doc 401155993) - Continental Resources, Inc.

Hi Christi,

The COGCC is reviewing the Form 2A oil and gas location assessment for the ALLENBY 1-8H well location in the NENE Sec8 T9N R61W, Weld County, and requests the following clarifications and changes to the Form 2A:

- 1) Construction:** Closed loop drilling is indicated on the Form 2A, but a Drilling Pit is also indicated on the Form 2A and on the Construction Layout Drawing. Please clarify the drilling method and use of the drilling pit.
- 2) Soils:** It appears that the access road and location will be partially built on the Olney fine sandy loam. Please approve me adding the NRCS unit "44 – Olney fine sandy loam 0 to 6 percent slopes" to the Form 2A.

- 3) **Water Resources:** A small pond that appears to perennially hold water is located 175 feet southwest of the proposed location. Please clarify how construction of the pad will either avoid the pond, or mitigate its disturbance.
- 4) **Water Resources:** The location is in the Upper Crow Creek Designated basin, and therefore a sensitive area by definition. COGCC will change the sensitive area designation from No to Yes.
- 5) **Reference Area:** The West facing Location Photograph does not clearly show the reference area. Based on the comments, the reference area will be west of the stockpile, which is approximately 250 feet west of the staked location. Please either submit clear photographs of the reference area, or agree to the following condition of approval: "Reference Area Photographs and Map must be submitted within twelve (12) months of the Form 2A (4/20/2012)."

Please contact me with any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
