Jim,

Thank you for the update. The current deadline for completion of corrective actions is 7/31/11. COGCC will work with you on the schedule as long as progress is being made, but I don't think Gary's schedule would be a good basis for an extension request. If he's too backed up to complete the work in a timely manner, you might want to consider some alternatives.

Let me know how it's progressing towards the middle of June.

Thanks,  
John

Hi John,  
Just wanted to give you an update on where we are in the process to correct the NOAV #200308970 issues. Apparently Gary Gardiner has been occupied with other sites and delayed by weather and has not gotten back to us regarding his schedule. I checked with his office on May 25 and he has not called me back. Our hope was to get profile samples of the material to be removed so that the landfill will pre-approve the disposal and we could just load and haul the material directly from the road. This would eliminate handling the soil twice. I was hoping for a much quicker response. Let me know if you have any questions.

Thanks,

Jim Wieger
