Subject: 2010 Annual Summary Report

Paul,

I have reviewed the 2010 Annual Project Summary Report submitted on June 7, 2011. COGCC approves the request to reduce monitoring wells from the sampling program at the following sites:

Alleley 31-34 #1 Project 473 (MW04R, MW05 & MW08)
Peppler 1-36 Project 3518 (MW25 & MW29)
Bacon #1 Project 3514 (MW15 & MW24)
Dos Rios 14-34 Project 3568 (MW06 & MW08)

The report included four sites where no further action status had already been approved. Three of the locations had the associated monitoring wells abandoned in 2010, and one location (Peppler 3-36 Project 1752) will have the wells abandoned in 2011. COGCC concurs with the ongoing monitoring and/or additional remediation recommended for the other eight sites.

The individual summaries for each location have been uploaded to the corresponding Project in COGIS for future reference.

Thank you,
John
