Subject: RE: YCF 2-22 - Follow-Up Sampling Results
Date: Tuesday, July 05, 2011 9:28:22 AM

Reed,

Based on review of information presented on June 10, 2011, it appears that no further action is necessary at this time. The release (SPILL #2523037) has been changed to closed status in the Colorado Oil & Gas Information System. Please retain a copy of this email as verification of COGCC concurrence with the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.

Subject: YCF 2-22 - Follow-Up Sampling Results

Chris:

Attached find follow-up sampling results for the incident that occurred on December 2-2010 on the YCF 2-22 pad. The attached tables represent sample points 1, 2, and 3. Also known as SS1, SS2, and SS3. I also attached the sampling map that has previously been submitted for your reference.

Keep in mind that the "Sample ID" listed in Table 2 and 3 is miss-leading due to the fact that two different technicians took the samples.

As a reminder, this incident was due to a break in the buried produced water pipeline on the pad.

Based on all the final sample results we consider this incident closed. If you have any questions please contact me directly. Reed
