RE: Rule 318.A(c) Exception Location Waiver: Twinning Waiver
C7B Well: 429' FSL, 431' FEL, SESE Sec. 34-T7N-R63W, Weld County, Colorado

To Whom It May Concern,

High Sierra Water Services, LLC (HSWS) intends to drill the above described injection well with a surface location greater than 50' from an existing well. Rule 318.A(c) stipulates that wells located within the Greater Wattenberg Area (GWA) and outside of a GWA window must be located no greater than 50' from an existing well. HSWS is the surface owner. Per COGCC Rules it is understood that we are required to approve this location and grant waiver of rule 318.A(c).

The nearest well to this is the High Sierra Water Services operated SWD #C7a, located 603' east.

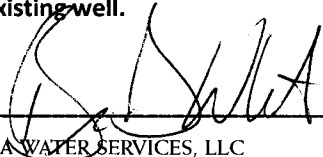

This well is spotted as above, in order to maximize the potential for future on-site injection facility operations and to minimize surface disturbance.

We grant this location as acceptable and indicate so by signing the below section.

Sincerely,

Bruce B. White
Senior Vice President
High Sierra Water Services, LLC

I, BRUCE B WHITE, acting as self or agent for High Sierra Water Services LLC, surface owner of the above described lands, with full power to execute the following, do hereby approve of the SWD #C7B well location as listed above on said lands in Section 34-T7N-R63W and grant a waiver to COGCC Rule 318.A(c) consenting that they may be located greater than 50' away from an existing well.

Signed  this 27 day of JULY, 2011
HIGH SIERRA WATER SERVICES, LLC
