Judy,

The COGCC is reviewing the Form 2A (#400194054) Marla 33-20 location, located in the NWSE Sec 20 T31S R65W Las Animas County, Colorado. The COGCC requests the following changes regarding the data submitted on or attached to the Form 2A prior to passing the Oil and Gas Location Assessment (OGLA).

1. Sensitive area: Due to the Gulnare-Allens Park Complex 5 to 35% slopes soil type the site is considered a sensitive area.
  - The sensitive area tab should be changed to YES.
2. **Conditions of Approval:** The following conditions of approval (COAs) will apply to the Marla 33-20:
  - Prior to putting a production pit into service Pioneer shall submit an Earthen Pit Report/Permit Form 15 to the Director for approval in accordance with rule 903.a.. No fluids shall be placed in a pit without a pre-approved form 15.
  - Location is in a sensitive area because of potential for adverse impacts to ground water/surface water; therefore all pits will be lined.
  - Reference area pictures shall be provided to the COGCC within 12 months of approval of the form 2A.
  - Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to keep a release of drilling, completion, produced fluids, or chemical products from migrating off the oil

and gas location.

If you have any questions or concerns, please do not hesitate to contact me.

Thanks,

Arthur
