Bill,

Same rig as the other @ 89'.

Regards,

Hey Paul,  
So that being the case,  $185/1.5 = 123'$  for the maximum rig height.  
How does that fit with the rig you will be using?  
Thanks,  
Bill

Bill,  
That 185' is to the nearest Utility Pole that was installed for the power for the Mackinaw 12-28 well (the first well on this location) then it goes underground from there.

**Subject:** Question on the King 12-28 doc. # 400184609

Hey Paul,  
Another distance situation.

Issue: Line #17 states 185' from the nearest.....

I have drawn a 185' radius circle from the SHL. That 185' would make contact with the private road that leads into the apparent residences to the south of the SHL.

That is not a public road.

The "nearest" structure appears to be 255' nearly due south of the SHL.

The rig height is the same issue as our earlier emails.

Please review and clarify.

Thanks,  
Bill
