Hi Bill –

This is to confirm that our maximum derrick height is 66'. We only use one rig which is #3 for coalbed drilling.

Hey Judy,

I just opened attachments for the form 2A and found that the 160' is for an overhead power line. That means that the power line will have to be dealt with one of two ways:

1. Moved or deactivated.
2. Rig height of less than 107'.

Thanks,  
Bill
